

Jury Instruction No. \_\_\_\_\_

According to a table of mortality, the life expectancy of [name] is [number] additional years. This figure is not conclusive. It is the average life expectancy of persons who have reached that age. This figure may be considered by you in connection with other evidence relating to the probable life expectancy of [name], including evidence of [name's] occupation, health, habits and other activities, bearing in mind that some persons live longer and some shorter than the average.
